

PROVIDING SERVICES FOR  
A-AAAKey Mini Storage

October 30, 2006

TO WHOM IT MAY CONCERN:

I have enjoyed working with Archcon Architecture over the past several years. As a developer, owner and operator of self-storage facilities throughout the United States, I have depended on Archcon for advice and counsel on a myriad of items related to space planning, zoning, and other general land development issues, as well as design and construction drawing production.

Jeff Dallenbach and Joe Bianco with their remaining Archcon team have been invaluable in designing a couple of our more recent ventures. Their skilled persistence in resolving various code issues during a plan review for a multi-story climate controlled facility in New Orleans kept the project moving forward in a timely manner. Their knowledgeable input during the value engineering phase of the project was innovative and realistic.

Of particular note is their effort while working through a renovation project in Aurora, Colorado. They researched the applicable codes and ordinances providing meaningful guidance through the approval process. That process was made more difficult by the unique demands required because of being located in a designated re-development zone. Archcon's knowledge and negotiating skill was pivotal in securing an approval from the city.

I am extremely pleased to recommend Archcon to other entities looking for comprehensive and quality architectural services.

Sincerely,
